

PRODIGY POWERCELL DIAGNOSTIC TOOL

TECHNICAL INFORMATION FOR LOCAL PRODUCTION

Diagnostic Tool composed of:

Black plexiglass base support + facing support + pull support

NOTICE

TECHNICAL PLANS AND FEASIBILITY OF ALL PARTIES (FUNCTIONALITY TEST) MUST BE CONFIRMED BY THE MANUFACTURER

PLEXIGLAS SUPPORT

Finished size: 240 x 185 mm

Height to define the manufacturer depending on the angle

Material: ALTUGLAS BLACK 101.48000

Edge rotating on top of 2 mm for insertion of the card sheet & translucent Plexiglas

FACING

Finished size: 240 x 185 mm

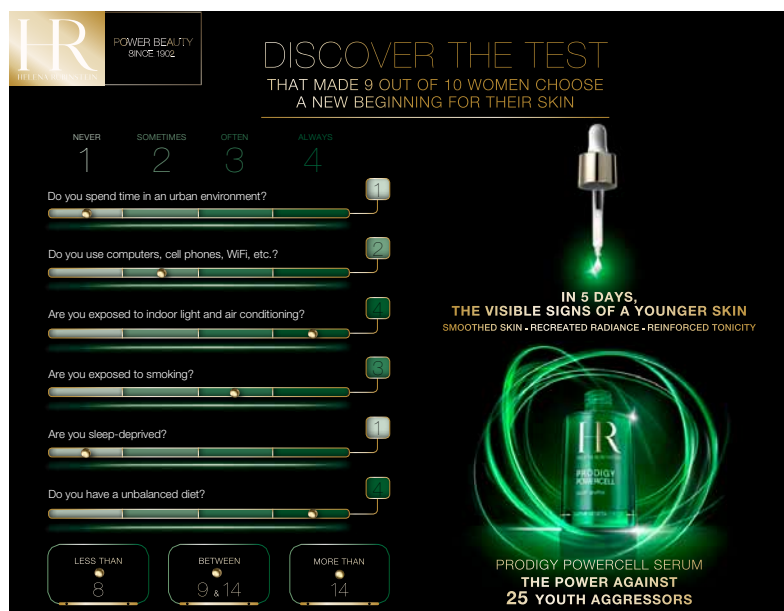

Paper: satimat 400 Grs

Material top: ALTUGLAS TRANSLUCENT 100.10000

Material base: ALTUGLAS BLACK 101.48000

Printing recto only: CMYK 4 colors + selective bright gold hot stamping on the logo and text

Finishing: glossy film on the recto side

Set a plexiglass plate on the printed card

Cut 3 windows and 6 mini-windows on the card and slip on plexiglass

Insert the assembly on the black plexiglass base support

Facing is composed of 3 windows and 6 mini-windows

WINDOWS INSIDE

Finished size: 31 x 18 mm

Paper: satimat 400 Grs

Printing recto only: CMYK 4 colors + selective bright gold hot stamping

Finishing: glossy film on the recto side

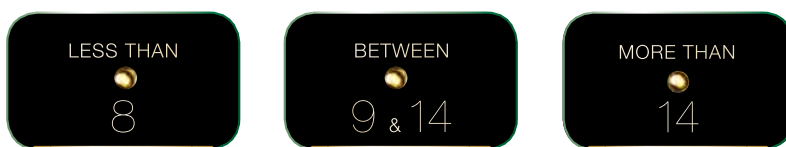

WINDOWS OUTSIDE

Finished size: 31 x 18 mm

Paper: satimat 400 Grs

Material: ALTUGLAS BLACK 101.48000

Printing recto only: gold engraving

cutting edge rounding

pose golden handle ball (x3) or brass handle > diameter 3mm

golden hinge (x3) or brass hinge

MINI-WINDOWS

Finished size: 100 x 13 mm
Paper: satimat 400 Grs
Printing recto only: CMYK 4 colors

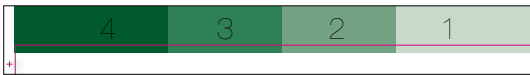

cutting edge rounding x6
pose golden handle ball (x6) or brass handle > diameter 3mm

NUMBERS ON MINI-WINDOWS

Finished size: 16 x 106 mm
Paper: satimat 400 Grs
Printing recto only: CMYK 4 colors

Cut & paste on ALTUGLAS TRANSLUCENT
cutting edge rounding x6

PULL SUPPORT

Finished size: 175 x 175 mm
Paper: satimat 400 Grs
Material base: ALTUGLAS BLACK 101.48000
Printing recto only: CMYK 4 colors + selective bright gold hot stamping on the logo and the text
Finishing: glossy film on the recto side

PRODIGY POWERCELL
youth grafter

UNIQUE STUDY ON 89 WOMEN*
UNDER 25 DAILY YOUTH AGGRESSORS,
EVEN EXTREME ONES:

- In one of the most polluted places in the world**
- 89 women ages 40-50
- Applying the serum twice a day for 28 days

REMARKABLE RESULTS:
NEARLY 100% FOR ALL TYPES OF WOMEN

Skin is better protected 96%	Skin is more radiant 100%
Skin is smoother 97%	Skin is more beautiful 98%
Skin looks younger 95%	Skin is more luminous 98%

DID YOU KNOW ?

POLLUTION | creates free radicals and weakens the "skin barrier" function: skin gets drier and more sensitive.

DAYLIGHT* | causes cell damage and is involved in breaking down collagen network: skin gets thinner, elasticity is lost, wrinkles & discoloration set on the skin.

COMPUTER WAVES | Exposure to computer waves creates the production of free-radicals, contributing to the acceleration of the ageing process and oxidative stress.

LACK OF SLEEP | slows down cell renewal process, repercussions to the skin are visible: dark circles, dull and tired looking skin.

OZONE | has damaging effects on the skin: depleting antioxidants, leading to a cascade of negative effects for the skin and cell damages.

INFRARED RAYS | amplify UV injury, contribute to skin ageing and deactivate some repairing process in the cells.

DERMATOLOGICAL TEST AND SELF-ASSESSMENT

WORK LIFE | exposure to computers, cell phones, confined spaces, indoor light, air conditioning, etc.

CITY LIFE | urban exposure to smoking, open air, walking outside, long work commutes, UV RAYS, infrared rays, heavy metals, weather changes, etc.

HOUSE LIFE | exposure to solvents, microwave, beauty, sprays, lack of sleep, etc.

EXTREME LIFE | over-exposure to stress factors (air, tight schedules, hard workouts, etc.)

* Conducted with 89 women ages 40-50 for 28 days ** Bangalore

Set the printed card on the black plexiglass base
Pull support with golden handle ball or brass handle > diameter 3mm
